

What to Expect During Your Roof Replacement

- Any lawn ornaments or furniture will be placed away from the house during the roofing process.
- We set tarps around the house to protect the shrubs and house to the best of our ability.
- The yard and driveway will be free and clear of any trash and roofing material at the end of each working day.
- The roof and gutters will be completely clean and spotless at the end of the job.
- The yard, walkways and driveways will be magnetically swept to remove nails from the grounds.
- All walkways, windowsills and driveway will be blown off at the completion of the job.

What You Can Do to Prepare for Your New Roof

- We ask that the driveway to be free and clear of any vehicles so we can have access with our vehicles and supply vehicles.
- Any vehicles that you may want to use during the day please have them removed from garages/car ports before our arrival that day.
- We recommend removing any items of value or concern from interior walls/ceilings/shelves prior to the job start.
- We recommend removal of any gutter guard systems prior to the job start.
- We recommend removing any landscape lights/ornaments that are around the entire perimeter of the house.
- We recommend you move or cover any belongings in your attic or garage that may be affected during the work.
- If you have a satellite dish attached to your roof, please make arrangements with your TV contractor to have it re-installed after the roof is completed.
- If you have a fence around your home, please have any gates unlocked prior to our arrival the morning of the roof installation.

Any questions about any of the above mentioned please contact your project manager.
